The present invention is generally directed to an apparatus for viewing of recorded information and more particularly to an apparatus for viewing of recorded information wherein information recorded on a moving recording medium can be viewed from both sides of the recording medium. Recording mediums for the purpose of viewing recorded information have traditionally been of the stationary type, i.e. of the type where a record bearing surface moves in a single plane in relation to the record viewing apparatus. Apparatus have heretofore been proposed for viewing of recorded information where the recorded information is recorded on a moving recording medium and where the recorded information is viewed from both sides of the recording medium by operation of the apparatus. Examples of such prior proposed apparatus include a fanned display which causes the recorded information to be viewed from both sides of a recording medium by the movement of the recording medium past a viewing window through which the recorded information is viewed, and apparatus disclosed in U.S. Pat. Nos. 3,815,781 and 3,871,812 which utilize a rotating disk as the recording medium on which information is recorded in a spiral path around the circumference of the disk. However, such proposed apparatus have not found wide spread usage due to the relatively complicated nature of such apparatus as well as the relatively high cost of such apparatus and further require precise synchronization between the rotating recording medium and the frame of reference for the apparatus.先ほど1,000万人にプロプレイヤーコースの利用が許可されたゲーム「あつまれ どうぶつの森」で、新たにプロスタッフが登場した。「あつまれ どうぶつの森」の新シリーズ「あつまれ どうぶつの森 キャラクターで最高のプレイ」の新キャラクターが登場した。なお、登場された新キャラクターは「あつまれ どうぶつの� 0cc13bf012
